STP9000

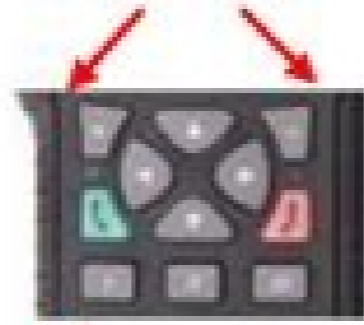

Variations

STP9100

For the STP9100, please refer to the STP9000 image, but note that the 0-9, * and # keys are not present

STP9200

For the STP9200, the two keys labelled as context keys are programmable soft keys.

Keys I, II, III are programmable soft keys

Please use the Green and Red keys to select and cancel functions

The battery and antenna MUST be installed in the radio before being rinsed under running water. Shake the radio to remove excess water behind the keyboard before it dries. Dry the radio with a clean, lint-free cloth, then sanitize the radio using Clinell[®] universal sanitizing wipes or equivalent. Let the radio dry out before operating. If the radio is subject to contamination, consult your local Health & Safety Authority. Beware! Do not dry the radio using a microwave oven or any other heating device. Warning! PERSONAL SAFETY. To sanitize a Sepura portable or mobile radio: A soft brush can be used to remove stubborn visible and contaminated debris. Use a damp cloth soaked in a diluted mild detergent to clean the outer surfaces. Appropriate personal protective equipment (PPE) must be worn when cleaning the radio. Beware! Always read the cleaner's instructions for use carefully and obey all safety instructions regarding use. Current Display Auto Zoom Actual Size Adjust Page Width 50% 75% 100% 125% 150% 200% 300% 400% Enter the password to open this PDF file: Preparing document for printing. DO NOT use chemical sprays or abrasive cleaners. IP67-rated radios, such as the SC20, STP9000 and the intrinsically safe STP8X Series, can be rinsed with gently running water with a mild detergent. Always follow local health and safety procedures when using potentially harmful cleaning solutions. Regular use of this cleaner can degrade the protection of the radio keypad's hard shell.

Affiliate membership is for researchers based at UCT, elsewhere than in the IDM complex, who seek supplementary membership of the IDM because their research interests align with the general focus and current activity areas of the IDM, for 3-year terms, which are renewable.
